Daily Interface Traffic Report

Sunday, 11 October 2026 · 2026-10-11 00:00 – 24:00 · Asia/Riyadh (UTC+03:00)

NO DATA

0 of 2 interfaces reporting

NO DATA

No interface samples were received for 2026-10-11

Traffic and utilisation figures are intentionally not shown: a day without data is not the same as a day with zero traffic.

INTERFACES CONFIGURED	INTERFACES REPORTING	PREVIOUS-DAY COMPARISON
2	0	N/A
selected in the interface configuration	for the reporting day	not shown without data

Technical Details

CONFIGURED INTERFACES

SITE	DEVICE	INTERFACE	SPEED	RESULT
SITE-A	SITE-A	Gi0/0	1.0 Gb/s	NO DATA
SITE-B	SITE-B	Gi0/0	1.0 Gb/s	NO DATA

DATA QUALITY & METHODOLOGY

- Rates come from the Zabbix interface items (Bits received / Bits sent), already converted from SNMP counters by Zabbix; a counter reset appears as a missing sample, never as zero or as a spike.
- Averages use the time actually covered by samples; coverage shows how much of the day that is. Utilisation = rate / configured interface speed and is N/A when no speed is configured.
- Samples above the configured interface speed (+5 %) are excluded as anomalies and counted in the data-quality table - they usually mean a wrong speed setting.
- Totals are shown only for explicitly configured boundaries and only over intervals where all member interfaces reported. Interfaces are never added together otherwise.
